

EXTENDED ABSTRACT

Therefore, the idea 5 in 1 solution soil for Happy Farmer popped up as an effort of going green and reducing the waste in a fun way. It is simple, easy, practical and fun. Moreover, 5 in 1 solution ingredients for Happy Farmer have natural anti-fungal properties. 5 in 1 solution ingredients for Happy Farmer also are the ideas growing medium for containerized plants. Studies have shown that plants grow more rapidly in soil supplemented with compost, meaning they can pull more carbon dioxide out of the air. According to the EPA, United States Environment Protection Agency the amount of carbon sequestered in soil and plants after wet compost is applied could significantly reduce greenhouse gasses if applied on a large scale. So start we start with ideas with composting 5 types of Ingredients. Our Invention soil is nature eco-friendly to planets will be growth more healthy more important is the Farmer Happy with “HAPPY FARMER”.
